

CRASH 2012

In the spring of 2003 there was a single vehicle accident that resulted in the death of 3 passengers. The accident occurred on US Highway 14 between Sundance and Devil's Tower. The driver was in a rented Ford SUV and while passing another vehicle lost control and rolled the vehicle. The driver was initially charged with speeding but has disputed that claim. He claims that the high rollover rate of SUV vehicles is a primary factor rather than the speed.

Evaluate the evidence from the crash scene and make your own determination as to what happened and determine what, if any, charges against the driver should be filed. Determine whether the auto manufacturer has any liability as well. Address the laws of physics as well as state and federal laws that apply. Reconstruct the accident in a 3-D format for the audience. Present December 13th @ 9:00 a.m. to an informed audience.
